

Site Evaluation Questionnaire**CR:**

1. Number of sites
2. X-ray volume at each site (per day best, but anything works as long as we know the time frame)
3. How many plates / cassettes are needed per CR unit?
4. Does the site do any Scoliosis or long-length type work requiring image stitching?
5. What is the application? (Orthopedic, Podiatry, Chiropractic, Veterinary, Equine, or General Radiography)

PACS:

1. How many locations?
2. What modalities do they have? Be specific – Manufacturer, model, type, is it DICOM? *If a modality is not DICOM a converter box will be needed at additional cost for each.*
3. What do they want to accomplish?
4. Are they reading/storing the images in-house?
5. Are they sending the images to an outside service for reading?
6. Do they want to read/store in house AND send outside?
7. Will each location be reading their own images or will all images be read at one location?
8. If they are storing their own studies, what type of backup do they want?
 - a. Backup to another archive on/off-site? (automated - least expensive)
 - b. DVD Archiving for off-site storage? (automated - a little more expensive)
 - c. Manual DVD archiving? (manual, time consuming - inexpensive)
 - d. Hard Drive complete daily backup (on-site, inexpensive)
9. How many people need access to review the images at the same time?
10. Do referring physicians need access to the images? How many? How many at the same time?
11. How many review stations do they want in each location?
 - a. How many for Diagnostic reading purposes?
 - b. How many for patient review purposes?
